Netlify redirects
This repository contains a simple affiliate landing page and Netlify server-side redirects (301) that send visitors to partner ClickBuy.html — short privacy & affiliate disclosure
- CNAME — sweetlawn.com (keep if you plan to use custom domain)
Deploy on Netlify:
1. Create a Netlify site.
2. Set up a CNAME record for your custom domain.
3. Netlify will respect the `._redirects` file and issue 301 server-side redirects for `/go/*` paths.
4. Point your domain (if you have one) to Netlify.
To help record clicks in GA4, the landing page attempts to send a GA4 event before navigating.
- If you prefer server-side click logging, we can enable it for you.
